---

SUMMARY

Web Developer with practical experience working across frontend, backend, and APIs using React, Next.js, Node.js, and TypeScript. Comfortable building end-to-end features, designing REST, RPC, and GraphQL APIs, and handling authentication, data flow, and integrations. I follow scalable API practices and have worked with logging, monitoring, containers, and basic system design concepts.

TECHNICAL SKILLS

- **Languages:** Html, Css, JavaScript (ES6+), TypeScript, Java.
- **Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS, shadcn/ui, Material UI.
- **Backend:** Node.js, Express.js, REST APIs ,tRPC, GraphQL, Socket.io , WebSocket
- **Database:** MongoDB, MySQL,PostgreySQL, Prisma(ORM).
- **Tools & DevOps:** Git, Docker, Kubernetes.

PROJECTS

Website Builder

- Built a full-stack web application using **Next.js and TypeScript**, with type-safe APIs implemented through **tRPC** and data handling via **React Query**. Designed and managed the database using **Neon (PostgreSQL)** and **Prisma**. Implemented authentication using **Clerk** along with custom auth flows. Integrated **Inngest** for background jobs and **Gemini** for AI-based features. Containerized the application using **Docker** and deployed on **Vercel**.

Real-Time Chat App (Real-Time Web App)

- Built a real-time chat application using **React and TypeScript** with a **Node.js and Express** backend. Implemented real-time messaging and **notification system** using **Socket.IO** for one-to-one and group chats, along with authentication and message handling, Designed REST APIs with proper validation and error handling, and focused on **scalable API structure, security practices, and basic logging** for reliability.

AI Image Generator

- Built an AI-based image generation web application using **Next.js** with backend APIs to handle prompt processing and image generation. Integrated external AI services for generating images and managing user data and history using a database. Focused on clean API design, error handling, and basic logging for reliable performance.

AI PDF Summarizer

- Built an AI-based PDF summarizer using **Next.js** with backend APIs for file processing and text extraction. Implemented PDF upload and handling with **Neon DB** for storage and metadata management. Integrated **Gemini (LLM)** to generate summaries, with proper API handling, error management, and basic logging to ensure reliability and performance.

EDUCATION

- **BSC – Computer Science :** Pandit Shambhunath Shukla University, 2023

CERTIFICATIONS

- JavaScript Algorithms and Data Structures – freeCodeCamp
- Backend Development with Node.js – Coursera
